***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach a method for use in making an electrostatic driving structure having a first area of a surface of a dielectric and a second electrode in a second area of the surface of the dielectric that is spaced apart from the first area so as to define a gap on the dielectric surface between the first electrode and the second electrode, with a first electrostatic shield made of non-insulating material on the electrostatic driving structure adjacent the gap and electrically coupling the first electrostatic shield to a source of potential, where the shield includes a portion disposed on the first electrode adjacent the gap and a portion disposed on the dielectric material in the gap between the electrodes, or the electrostatic shield that is disposed on the first electrode and extends laterally to overhang at least a part of the gap or the shield having the shape of a mushroom. The prior art does not teach an electrostatic shield made of non-insulating material coupled to a first electrode on the surface of a dielectric material, where the first electrode being separated from a second electrode on the surface of the dielectric material by a gap, where the shield includes a portion on the first electrode adjacent the gap and a portion on the dielectric material in the gap. Applicant's arguments regarding Rodgers and claim 38 is persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
